## Summary

I'm a designer that's passionate about designing valuable products and crafting smooth experiences, paying great attention to detail. I'm also a budding web interface developer.

## Experience

### UI/UX Design Intern

#### HNG Internship

Jun 2020 - Jul 2020 (2 months)

- I was part of the design team of a web-based TaaS (Talent as a Service) product and contributed to the design. I also led a sub-team of three designers to design the user flow of the product from top to bottom using Whimsical.
- I was responsible for the end-to-end prototyping of the product to ensure flow clarity for the developers, and also collaborated closely with frontend developers giving, taking and implementing feedback where necessary.
- I led the design direction and development (with HTML, CSS and vanilla JavaScript) of a feature that could be integrated into a fintech company's product.
- I worked on other products individually, paired with a frontend developer, and as part of a larger product team.

### Intern

#### start.ng

Mar 2020 - Jun 2020 (4 months)

- I learned about frontend development (using HTML, CSS and vanilla JavaScript) and collaboration using Git and GitHub, and software testing, with hands-on tasks.
- I designed and developed a portfolio website (which I extended into my personal website) as a mini project.

## Education

### Federal University, Oye Ekiti

Mathematics

## Licenses & Certifications

### Enterprise Design Thinking Practitioner - IBM

## Skills

User Experience (UX) • User Interface Design • HTML5 • Cascading Style Sheets (CSS) • JavaScript • Figma (Software) • Clubhouse Project Management
